The integration of academic thinking with authentic, experience-driven learning will equip you, inspire you, and position you for career acceleration.

Distinguish yourself from your peers. Graduate-level education provides you with not only the 150 credit hours required to pursue a CPA license, but also advanced knowledge and skills tied to the core areas of accounting. Get on the fast track now and see how just seven months can make a big difference in your accounting career. To earn your degree, you’ll complete 15 credits from the core curriculum and nine additional credits of track-specific coursework. Your remaining six credits will be open electives that can be chosen from either track.
