Leverage data to solve business problems and drive business strategy.

The amount of data and technology at our disposal can lead to impressive results, but it also means you must perform at higher levels to keep up. That’s where we come in. The D’Amore-McKim School of Business is creating tomorrow’s leaders through our STEM-designated Master of Science in Business Analytics. With an innovative curriculum taught by expert business school faculty, our program prepares you for a leadership role in which you will be required to recognize and respond to potential challenges and make strategic decisions amidst uncertainty. Through in-class case studies, your professors will integrate real company data as you explore questions such as how to build sales, enhance marketing, or strengthen a company’s infrastructure.

The curriculum is subject to change by D’Amore-McKim faculty.
Your MS in Business Analytics Path to Your MBA

Your MS in Business Analytics can get you halfway to an MBA.

Once your degree is complete and you’ve maintained at least a 3.0 GPA and a minimum grade in each class, you may be able to apply your 30 credits toward an eligible MBA program at Northeastern. (Note that your existing master’s degree is not a guarantee of acceptance to an MBA program.) Once accepted, you’ll be eligible for the Double Husky scholarship, which reduces your tuition by 25 percent.

Completed Through MS in Business Analytics
